**Craft board game jewelry box upcycle**

7 Comments · 13 Saves · 11 Likes :) I like this

1

Place the game board facedown with the hinge running horizontally. Measure and mark four lines: parallel to the edges of the game board: 3 1/2" in from the left and right edges, 3 1/2" up from bottom edge, and 3 1/2" up from the hinge. Use the utility knife to cut along the dotted section of each line as shown, removing the shaded areas.

2

Measure and mark four more lines as shown, parallel to your first set: 1/16" below the top marked line, 1/16" below the bottom marked line, and 1/16" to the inside of the left and right marked lines.

3

Score each line in the second set, making sure not to cut all the way through. Carefully peel away the resulting strips of cardboard one layer at a time, until each joint bends easily to a 90-degree angle.

4

One at a time, run a bead of hot glue along each joint, then fold the sides up. Hold in place until the glue sets (or gently tape the sides together), then run a bead of glue along the inside of each corner.

5

Cut a few bills of Monopoly money (or sheets of colored scrap paper) into 1/2" wide strips. Attach the strips to the outside of the box's corners and lid with white glue, covering the raw edges.

6

If desired, use the leftover pieces of game board to create dividers within the box, and line it with fabric or felt.

7

Store your beads and baubles in your new community chest!
